DJ Stand Front Curtain

Smart all black front curtain
with lift up & out brackets and crossbar

Smart Finish to any DJ Stand

Lifts cloth to cover rear of kit

Brackets keep cloth forward of stand

Folds away for ease of transport

Quick to position and remove

Fits all Ultimax DJ Stands

A simple and quick way to quickly add a classy frontage to Ultimax DJ Stands. One size fits all Ultimax 1.2m, 1.6m, and 1.7m stands, by utilising a 1.875m total length crosspiece that also comes apart for easy transport.

The bar is fixed to the stand by means of a pair of accessory couplers that ensure the actual curtain is lifted approximately 240mm above the side of the deck stand (approx. 360mm above the actual deck stand shelf). This gives a great advantage as it covers the rear of most DJ Consoles and ensures you show looks very tidy.

The black front cloth simply slides through the 2 piece crossbar, and then the cloth can be rolled round the tube to ensure the perfect height regardless of whether your stand has wheels or not. Very quick to assemble and ultra compact in transit.
