

# FS3000 LED

Code: I237000304

The FS3000LED is a powerful and feature-packed follow spot that is joining ADJ's range of theatrical stage lighting fixtures. Powered by a potent 300W warm white COB LED engine with a CRI of 98, the unit generates a powerful spotlight ideal for tracking performers on concert and theatre stages. It features digital dimming, an adjustable beam angle of 12 ~ 44-degrees, an iris, manual focus and a GOBO slot. The fixture supports both DMX and IR remote control, with an intuitive touchscreen interface on the rear panel facilitating DMX addressing and mode selection. In addition, a convenient rotary brightness control on the back panel makes for easy manual control, while two large rear handles allow for comfortable manual positioning.
