Unique to B&C, a complete lineup of high sensitivity and power handling 4", 5" and 6.5" frame transducers. These high technology products are made with our famously critical quality control, allowing new compact loudspeaker designs with appropriately scaled performance. Combined with a 1.4" dome compression driver, our 5CXN36 coaxial is one of the most compact and cost effective full range transducers that we have ever built, offering 94 - 18000Hz frequency response and a 70° conical coverage pattern.
