# OVNTION E-91OFC IP 

## User Manual

CHAYVEI

## Edition Notes

The Ovation E-910FC IP User Manual includes a description, safety precautions, installation, programming, operation and maintenance instructions for the Ovation E-910FC IP.

## Trademarks

CHAUVET, the Chauvet logo and Ovation E-910FC IP are registered trademarks or trademarks of Chauvet \& Sons, LLC (d/b/a Chauvet and Chauvet Lighting) in the United States and other countries. Other company and product names and logos referred to herein may be trademarks of their respective companies.

## Copyright Notice

The works of authorship contained in this manual, including, but not limited to, all design, text and images are owned by Chauvet.
© Copyright 2021 Chauvet \& Sons, LLC. All rights reserved.
Electronically published by Chauvet in the United States of America.

## Manual Use

Chauvet authorizes its customers to download and print this manual for professional information purposes only. Chauvet expressly prohibits the usage, copy, storage, distribution, modification, or printing of this manual or its content for any other purpose without written consent from Chauvet.

## Document Printing

For best results, print this document in color, on letter size paper ( $8.5 \times 11 \mathrm{in}$ ), double-sided. If using A4 paper ( $210 \times 297 \mathrm{~mm}$ ), configure the printer to scale the content accordingly.

## Intended Audience

Any person installing, operating, and/or maintaining this product should completely read through the guide that shipped with the product, as well as this manual, before installing, operating, or maintaining this product.

## Disclaimer

Chauvet believes that the information contained in this manual is accurate in all respects. However, Chauvet assumes no responsibility and specifically disclaims any and all liability to any party for any loss, damage or disruption caused by any errors or omissions in this document, whether such errors or omissions result from negligence, accident or any other cause. Chauvet reserves the right to revise the content of this document without any obligation to notify any person or company of such revision, however, Chauvet has no obligation to make, and does not commit to make, any such revisions. Download the latest version from www.chauvetprofessional.com.

## Document Revision

This Ovation E-910FC IP User Manual is the $7^{\text {th }}$ edition of this document. Go to www.chauvetprofessional.com for the latest version.

## 1. Before You Begin

## What Is Included

- Ovation E-910FC IP
- Quick Reference Guide
- Seetronic Powerkon IP65 Power Cord

## Claims

Carefully unpack the product immediately and check the container to make sure all the parts are in the package and are in good condition.
If the box or the contents (the product and included accessories) appear damaged from shipping, or show signs of mishandling, notify the carrier immediately, not Chauvet. Failure to report damage to the carrier immediately may invalidate your claim. In addition, keep the box and contents for inspection.
For other issues, such as missing components or parts, damage not related to shipping, or concealed damage, file a claim with Chauvet within 7 days of delivery.

## Manual Conventions

| Convention | Meaning |
| :---: | :--- |
| $\mathbf{1 - 5 1 2}$ | A range of values |
| $\mathbf{5 0 / 6 0}$ | A set of values of which only one can be chosen |
| <SET> | A button on the product's control panel |
| Settings <br> Symbols | A product function or a menu option |
| Symbol | Meaning |
| ! | Electrical warning. Not following these instructions may cause electrical damage to <br> the product, accessories, or the user. |
|  | Critical installation, configuration, or operation information. Not following these <br> instructions may make the product not work, cause damage to the product, or cause <br> harm to the operator. |
| In | Important installation or configuration information. The product may not function <br> correctly if this information is not used. |

Any reference to data or power connections in this manual assumes the use of Seetronic IP-rated cables.

The term "DMX" used throughout this manual refers to the USITT DMX512-A digital data transmission protocol.

## FCC Compliance

This device complies with Part 15 Part B of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## Safety Notes

Read all the following safety notes before working with this product. These notes contain important information about the installation, usage, and maintenance of this product.

This product contains no user-serviceable parts. Any reference to servicing in this User Manual will only apply to properly trained, certified technicians. Do not open the housing or attempt any repairs.

All applicable local codes and regulations apply to proper installation of this product.

## Personal Safety

- Avoid direct eye exposure to the light source while the product is on.
- Always disconnect the product from the power source before cleaning or replacing the fuse.
- Always connect the product to a grounded circuit to avoid the risk of electrocution.
- Do not touch the product's housing when operating because it may be very hot.

## Mounting and Rigging

- Do not submerge this product (IP65). Temporary outdoor operation is fine.
- When using this product in an outdoor environment, use IP65 (or higher)-rated power and data cables. Secure unused power and data ports with attached IP65 covers.
- CAUTION: When transferring product from extreme temperature environments, (e.g., cold truck to warm, humid ballroom) condensation may form on the internal electronics of the product. To avoid causing a failure, allow product to fully acclimate to the surrounding environment before connecting it to power.
- Not for permanent outdoor installation in locations with extreme environmental conditions. This includes, but is not limited to:
- Exposure to a marine/saline environment (within 3 miles of a saltwater body of water).
- Locations where the normal high or low temperatures exceed the temperature ranges in this manual.
- Locations that are prone to flooding or being buried in snow.
- Areas where the product will be subjected to extreme radiation or caustic substances.
- Mount this product in a location with adequate ventilation, at least $20 \mathrm{in}(50 \mathrm{~cm})$ from adjacent surfaces.
- Make sure there are no flammable materials close to the product when operating.
- When hanging this product, always secure to a fastening device using a safety cable.

## Power and Wiring

- Always ensure that the product is connected to the proper voltage in accordance with the specifications in this manual or on the product's specification label.
- Never connect the product to a dimmer pack or rheostat.
- Never disconnect this product by pulling or tugging on the power cable.

## Operation

- Do not operate this product if there is damage on the housing, lenses, or cables. Have the damaged parts replaced by an authorized technician at once.
- Do not cover the ventilation slots when operating to avoid internal overheating.
- The maximum ambient temperature is $113^{\circ} \mathrm{F}\left(45^{\circ} \mathrm{C}\right)$. Do not operate the product at higher temperatures.
- The minimum startup temperature is $-4^{\circ} \mathrm{F}\left(-20^{\circ} \mathrm{C}\right)$. Do not start the product at lower temperatures.
- The minimum ambient temperature is $-22^{\circ} \mathrm{F}\left(-30^{\circ} \mathrm{C}\right)$. Do not operate the product at lower temperatures.
- In the event of a serious operation problem, stop using this product immediately!

If your Chauvet product requires service, contact Chauvet Technical Support.

## Expected LED Lifespan

LEDs gradually decline in brightness over time, primarily because of heat. LEDs that are arranged in clusters experience higher operating temperatures than single LEDs. For this reason, operating clustered LEDs at their fullest intensity significantly reduces the LEDs' lifespan. Under normal conditions, this lifespan is 40,000 to 50,000 hours. If extending this lifespan is vital, lower the operating temperature by improving the ventilation around the product, thus reducing the ambient temperature. In addition, limiting the overall projection intensity may extend the LEDs' lifespan.

## 2. Introduction

## Description

The Ovation E-910FC IP takes the high-performance, full RGBA-Lime color-mixing LED engine of the Ovation E-910FC outdoors. Chauvet's standard shutter assembly and lenses lend familiarity and ease of use to this IP65 ERS-style fixture that offers color temperature presets of 2800 to 6500 K that match the output of a tungsten source to perfection. Control options include full bit dimming (per color and master), selectable PWM, RDM, and on-board dimming curves selection. Also accessible is Chauvet's virtual color wheel that matches popular color gels.

## Features

- Operating modes:
- HSV: hue, saturation, value, gobo rotation
- 1-channel: dimmer
- 4-channel: dimmer, virtual color wheel, color temperature, gobo rotation
- 6-channel: RGBAL control, gobo rotation
- 8-channel: dimmer, RGBAL control, strobe, gobo rotation
- 11-channel: 16-bit dimmer, RGBAL control, strobe, virtual color wheel, color temperature, gobo rotation
- 13-channel: dimmer, RGBAL control, strobe, virtual color wheel, color temperature, auto programs, auto speed, dimmer speed mode, gobo rotation, red shift
- 14-channel: 16-bit RGBAL and dimmer, strobe, gobo rotation
- 17-channel: 16-bit RGBAL and dimmer, strobe, virtual color wheel, color temperature, gobo rotation, red shift
- Full-color LED (RGBAL) ERS-style lighting fixture for theatre, film, and production
- Fully IP65-rated for seasonal use indoors or out
- Use of our standard Ovation beam shaping shutters and lenses lends familiarity and ease of use to the fixture
- Virtual color wheel with color matched to popular gel colors
- Color temperature presets from 2800 K to 6500 K with high CRI and CQS
- Ultra-smooth 16 -bit dimming and 8 -bit dimming curves to complement any lighting scheme.
- Flat, even field of light for superior gobo projection
- RDM (Remote Device Management) for added flexibility
- Adjustable PWM (Pulse Width Modulation) to avoid flickering on camera

## Lens Tube

The following lens tubes are available for purchase:

- $14^{\circ} \mathrm{w} /$ gel frame ( $7.5 \mathrm{in} / 191 \mathrm{~mm}$ accessories)
- $19^{\circ} \mathrm{w} /$ gel frame ( $6.25 \mathrm{in} / 159 \mathrm{~mm}$ accessories)
- $26^{\circ} \mathrm{w} / \mathrm{gel}$ frame ( $6.25 \mathrm{in} / 159 \mathrm{~mm}$ accessories)
- $36^{\circ} \mathrm{w} / \mathrm{gel}$ frame ( $6.25 \mathrm{in} / 159 \mathrm{~mm}$ accessories)
- $50^{\circ} \mathrm{w} /$ gel frame ( $6.25 \mathrm{in} / 159 \mathrm{~mm}$ accessories)
- $15^{\circ}-30^{\circ} \mathrm{w} /$ gel frame ( $7.5 \mathrm{in} / 191 \mathrm{~mm}$ accessories)
- $25^{\circ}-50^{\circ} \mathrm{w} /$ gel frame ( $7.5 \mathrm{in} / 191 \mathrm{~mm}$ accessories)

## Product Overview

## Product Dimensions

## 3. Setup

## AC Power

Each Ovation E-910FC IP has an auto-ranging power supply that works with an input voltage range of 100 to $240 \mathrm{VAC}, 50 / 60 \mathrm{~Hz}$. To determine the power requirements for each Ovation E-910FC IP, refer to the label affixed to the product or to the Technical Specifications chart in this manual.
The listed current rating indicates the maximum current draw during normal operation. For more information, download Sizing Circuit Breakers from the Chauvet website: www.chauvetprofessional.com.

- Always connect the product to a protected circuit (a circuit breaker or fuse). Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.
- To eliminate unnecessary wear and improve its lifespan, during periods of non-use completely disconnect the product from power via breaker or by unplugging it.

Never connect the product to a rheostat (variable resistor) or dimmer circuit, even if the rheostat or dimmer channel serves only as a to $\mathbf{1 0 0 \%}$ switch.

## AC Plug

The Ovation E-910FC IP comes with a power input cord terminated with a Seetronic Powerkon A connector on one end and an Edison plug on the other end (U.S. market). If the power input cord that came with the product has no plug, or if the plug needs to be changed, use the table below to wire the new plug.

| Connection | Wire (U.S.) | Wire (Europe) | Screw Color |
| :---: | :---: | :---: | :---: |
| AC Live | Black | Brown | Yellow or Brass |
| AC Neutral | White | Blue | Silver |
| AC Ground | Green/Yellow | Green/Yellow | Green |

## Power Linking

The product supports power linking. It is possible to power link up to 7 Ovation E-910FC IP products at 120 V , up to 11 products at 208 V , or up to 12 products at 230 V . This product comes with a power input cord. Power-linking cables are available for purchase from Chauvet.

- Use Seetronic Powerkon cables to preserve the IP65 rating and the warranty of this product.
- Insert the attached IP65-rated plugs into the corresponding power/data connections when not in use.

## Fuse Replacement

1. Disconnect this product from the power outlet.
2. Using a Phillips-head screwdriver, unscrew the fuse holder cap from the housing.
3. Remove the blown fuse and replace with another fuse of the same type and rating (T $3.15 \mathrm{~A}, 250 \mathrm{~V}$ ).
4. Screw the fuse holder cap back in place and reconnect power.

Make sure to disconnect the product's power cord before replacing a blown fuse. Always replace the blown fuse with another of the same type and rating.

## DMX Linking

The Ovation E-910FC IP can be linked to a DMX controller using a 5-pin DMX connection. Other DMXcompatible products used with this product can be controlled individually using a single DMX controller.

## DMX Personalities

The Ovation E-910FC IP uses a 5 -pin DMX data connection for the HSV, 1Ch, 4Ch, 6Ch, 8Ch, 11Ch, 13Ch, 14Ch, or 17Ch DMX personalities.

- Refer to the Introduction for a brief description of each DMX personality.
- Refer to the Operation chapter to learn how to configure the Ovation E-910FC IP to work in these personalities.
- The DMX Values section provides detailed information regarding the DMX personalities.

For more information about DMX standards, Master/Slave connectivity, or the DMX cables needed to link this product to a DMX controller, download the DMX Primer from the Chauvet website: www.chauvetprofessional.com.

## Remote Device Management (RDM)

Remote Device Management, or RDM, is a standard for allowing DMX-enabled devices to communicate bi-directionally along existing DMX cabling. Check the DMX controller's User Manual or with the manufacturer, as not all DMX controllers have this capability. The Ovation E-910FC IP supports RDM protocol that allows feedback to make changes to menu map options.

## Master/Slave Connectivity

The Master/Slave mode allows a Ovation E-910FC IP (the master) to control one or more Ovation E910FC IP products (the slaves) without a DMX controller. One Ovation E-910FC IP becomes the master when running an auto or custom program, or by being in a Static mode.
Each slave's control panel must be configured to operate in Slave mode. During Master/Slave operation, the slaves will operate in unison with the master.

DO NOT connect a DMX controller to products operating in Master/Slave mode. The DMX controller signals may interfere with the signals from the master.

The Operation section of this manual provides detailed instructions on how to configure the master and slaves.

Use IP65 data cables to preserve the IP65 rating and the warranty of this product.

## Mounting

Before mounting the product, read and follow the safety recommendations indicated in the Safety Notes. For our CHAUVET Professional line of mounting clamps, go to http://trusst.com/products/.

## Orientation

Always mount this product in a safe position, making sure there is adequate room for ventilation, configuration, and maintenance.

## Rigging

Chauvet recommends using the following general guidelines when mounting this product.

- Before deciding on a location for the product, make sure there is easy access to the product for maintenance and programming purposes.
- Make sure that the structure onto which the product is being mounted can support the product's weight. See the Technical Specifications for weight information.
- When mounting the product overhead, always use a safety cable. Mount the product securely to a rigging point, whether an elevated platform or a truss.
- When rigging the product onto a truss, use a mounting clamp of appropriate weight capacity.
- When power linking multiple products, mount the products close enough for power linking cables to reach.
- The bracket adjustment knobs allow for directional adjustment when aiming the product to the desired angle. Only loosen or tighten the bracket knobs manually. Using tools could damage the knobs.

## Procedure

The Ovation E-910FC IP comes with a double-bracketed yoke that can be used as a floor stand or to which mounting clamps can be attached for hanging. Mounting clamps must be purchased separately. Ensure that the clamps can support the weight of this product. Use at least one mounting point per product where necessary.
Mounting Diagram

## Manual Beam Focus Control

The Ovation E-910FC IP has a manual focus, which is adjusted as follows:

1. Locate the beam focus knobs at the top and bottom of the barrel assembly.
2. Loosen the knobs by turning them counter-clockwise.
3. Slide the lens tube forward or backward until the desired focus or beam edge is achieved.
4. Tighten the knobs by turning them clockwise, which lock the lens tube's position.

To avoid changing menu settings while focusing the Ovation E-910FC IP, press and hold the <ENTER> button for 3 seconds. This will put the product in Focus Mode, by increasing the intensity to $100 \%$. To exit out of focus mode, press <MENU>.

## Rotating the Barrel Assembly

The Ovation E-910FC IP allows manual rotation of the barrel assembly, as follows:

1. Locate the barrel rotation knobs at the top and bottom of the light engine.
2. Loosen the knobs by turning them counterclockwise. (Note: Do not remove the knobs.)
3. Rotate the barrel to the desired position, up to $25^{\circ}$ in either direction from the centered position.
4. Tighten the knobs by turning them clockwise, which locks the barrel's position.

Ensure that the barrel assembly is oriented with the pattern holder and accessory slots at the top of the product.

## Accessory Slot

The Ovation E-910FC IP has an accessory slot, which holds a drop-in iris, a motorized pattern device, or various other optional accessories (sold separately).

1. Loosen the thumbscrews on the slot cover. (Note: Do not remove the thumbscrews).
2. Slide to cover forward.
3. Insert an accessory. (Note: Make sure to insert the accessory correctly. i.e., the iris handle extends upward from the slot.
4. Slide the cover back. Make sure any handles or adjustment tools that stick out the top are able to function correctly.
5. Tighten the thumbscrews to secure the cover.

Accessory Slot Cover

Sample Drop-in Iris

- When not using the accessory slot, replace and secure the slot cover to prevent light leakage during operation.
- When obtaining any optional accessories, be sure the items are compatible with the Ovation E-910FC IP.

## 4. Operation

## Control Panel Operation

| Button | Function |
| :---: | :--- |
| <MENU> | Exits from the current menu or function |
| <ENTER> | Enables the currently displayed menu or sets the currently selected value in to the <br> current function |
| <UP> | Navigates upward through the menu list or increases the numeric value when in a <br> function |
| <DOWN> | Navigates downward through the menu list or decreases the numeric value when in a <br> function |

## Control Options

Set the Ovation E-910FC IP starting address in the 001-509 DMX range. This enables control of up to 12 products in the 17-channel personality.

## Programming

Refer to the Menu Map to understand the menu options. The menu map shows the main level and a variable number of programming levels for each option.

- To go to the desired main level, press <MENU> repeatedly until the option shows on the display. Press <ENTER> to select. This will take you to the first programming level for that option.
- To select an option or value within the current programming level, press <UP> or <DOWN> until the option shows on the display. Press <ENTER> to select. In this case, if there is another programming level, you will see that first option, or you will see the selected value.
- Press <MENU> repeatedly to exit to the previous main level.

## Configuration (DMX)

Use DMX configurations to operate the product with a DMX controller.

## DMX Personalities

This setting allows you to choose a particular DMX personality.

1. Go to the DMX Channel main level.
2. Select the desired personality ( $\mathbf{1} \mathrm{Ch}, \mathbf{4 C h}, \mathbf{6 C h}, \mathbf{8 C h}, \mathbf{1 1 C h}, \mathbf{1 3 C h}, \mathbf{1 4 C h}, \mathbf{1 7 C h}$, or HSV).

- See the Starting Address section for the highest starting address for each personality.
- Make sure that the starting addresses on the various products do not overlap due to the new personality setting.

## Starting Address

In this mode, each product will respond to a unique starting address from the DMX controller. All products with the same starting address will respond in unison.

1. Go to the DMX Address main level.
2. Set the starting address (001-509).

The highest recommended starting address for each DMX mode is as follows:

| DMX Personality | DMX Address | DMX Personality | DMX Address |
| :---: | :---: | :---: | :---: |
| HSV | 509 | 11Ch | 501 |
| 1Ch | 511 | 13Ch | 499 |
| 4Ch | 508 | 14Ch | 498 |
| 6 Ch | 507 | 17 Ch | 496 |
| 8 Ch | 504 |  |  |

Menu Map

| Main Level | Programming Levels |  |  | Description |
| :---: | :---: | :---: | :---: | :---: |
| DMX Address | 001-509* |  |  | Selects DMX address (*highest channel restricted to personality chosen) |

## Virtual Color Wheel

The Ovation E-910FC IP includes a feature called the Virtual Color Wheel (VCW). This feature is available as a standalone control mode for manual use and as a control channel in select DMX personalities. More than 30 premixed colors, custom blended by Chauvet engineers, are available to call up for easier programming. The DMX values used to mix these colors are provided below. The overall intensity of the Ovation fixture can be adjusted to more closely replicate familiar colors. A chart is available on www.chauvetprofessional.com to compare Chauvet's premixed colors with popular gel colors. This chart is for comparison purposes only and is not a guarantee that Chauvet's premixed colors match any of the gel colors listed.

## Virtual Color Wheel Chart

| C4570-Blue Green | 0 | 255 | 79 | 30 | 53 |

Note: The colors above are simulated renditions of the color output produced compared with other similar incandescent products. Chauvet makes no guarantee of the color output accuracy.

## Color Temperature Chart

|  | R | G | B | A | L |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{2 8 0 0 K}$ | 187 | 130 | 97 | 255 | 255 |
| $\mathbf{3 0 0 0 K}$ | 177 | 145 | 105 | 255 | 255 |
| $\mathbf{3 2 0 0 K}$ | 168 | 157 | 113 | 255 | 255 |
| $\mathbf{3 5 0 0 K}$ | 163 | 177 | 124 | 255 | 255 |
| $\mathbf{4 0 0 0 K}$ | 151 | 195 | 141 | 255 | 255 |
| 4500K | 145 | 214 | 157 | 255 | 255 |
| $\mathbf{5 0 0 0 K}$ | 138 | 227 | 170 | 255 | 255 |
| $\mathbf{5 6 0 0 K}$ | 130 | 239 | 184 | 255 | 255 |
| $\mathbf{6 0 0 0 K}$ | 126 | 246 | 193 | 255 | 255 |
| $\mathbf{6 5 0 0 K}$ | 120 | 254 | 201 | 255 | 255 |

Note: The color temperatures above are simulated renditions of the color output produced compared with a tungsten lamp at the specified color temperature. Chauvet makes no guarantee of the color output accuracy.

## Configuration (Standalone)

Use standalone configuration to operate the product without a DMX controller.

## Focus Mode

Focus mode allows for focusing of the Ovation E-910FC IP without changing any menu settings.

1. Press and hold <ENTER> for 3 seconds. The output intensity will increase to $100 \%$.
2. Press <MENU> to exit focus mode and restore the settings.

## Virtual Color Wheel

The Ovation E-910FC IP offers more than 30 premixed colors based on gel colors. See the Virtual Color Wheel section for details on specific values. To select a gel color, do the following:

1. Go to the Virtual Color Wheel main level.
2. Select Virtual Color Wheel.
3. Select the desired gel color (see Virtual Color Wheel Chart).
4. Select the desired output level (0-255).

## Color Temperature

The Color Temperature mode offer preset white color temperatures that emulate a tungsten lamp at the specified color temperature. See the Color Temperature section for details on specified values. To select a color temperature, do the following:

1. Go to the Virtual Color Wheel main level.
2. Select Color Temperature.
3. Select the desired color temperature (see Virtual Color Wheel).
4. Select the desired output level ( $\mathbf{0} \mathbf{- 2 5 5}$ ).

## Manual Color Mixer

The Manual Color Mixer mode allows for permanent RGBAL color mixing without a DMX controller.

1. Go to the Virtual Color Wheel main level.
2. Select Manual Color Mixer.
3. Select the color to edit (Red, Green, Blue, Amber, or Lime).
4. Select the desired output level for that color (0-255).
5. Repeat steps 3 and 4 until product outputs as desired.

## Auto Programs

Auto programs allow for dynamic blinder effects without a DMX controller.

1. Go to the Auto Show main level
2. Select the desired auto program (Auto 1-5).
3. Select the desired speed (1-100).

The auto programs cannot be edited.

## Red Shift

The Red Shift function causes the amber LEDs to imitate the appearance of a halogen lamp when dimming.

1. Go to the Red Shift main level.
2. Select On or Off.

## Gobo Rotator

(for use with Ovation GR-1 IP, sold separately)
The gobo rotator mode controls the Ovation GR-1 IP rotation speed.

1. Go to the Gobo Rotator main level.
2. Select the desired value (0-255).

## Dimmer Curve

To set the dimmer curve, follow the instructions below:

1. Go to the Dimmer Curve main level.
2. Select the desired option (Linear, Square, I Squa, or SCurve).
3. Press <ENTER>.

## Master/Slave

The Master/Slave mode allows a group of Ovation E-910FC IP products (the slaves) to simultaneously duplicate the output of another Ovation E-910FC IP (the master) without a DMX controller.
To set each of the slaves:

1. Go to the Master/Slave main level
2. Select Slave.

To set the master:

1. Go to the Master/Slave main level
2. Select Master.
3. Select a static setting.

- The master is the one that runs a program whether in Auto or Static mode.

- Do not connect a DMX controller to the products configured for Master/Slave operation. The DMX controller may interfere with signals from the master.
- The master should be the first product in the daisy chain.

## Dimmer Profiles

This setting determines how fast the output of the Ovation E-910FC IP changes when the output value is modified. It provides four different options to simulate the dimming curve of an incandescent lighting product.

1. Go to the Dimmer Mode main level.
2. Select a dimmer curve (Off, Dimmer 1, Dimmer 2, or Dimmer 3).

Off: The output is proportional (linear) to the dimmer channel value.
Dimmer 1-3: The output follows the dimmer value based on the corresponding dimmer curve, Dimmer 1 being the fastest.

## White Balance

This setting determines the maximum output values for each color, which affects the appearance of a full output white.

1. Go to the White Balance main level.
2. Select Off (the product will use a default setting) or Manual.
3. For Manual mode, select the color value to edit (Red, Green, Blue, Amber, or Lime).
4. Set the maximum value for the selected color (125-255).
5. Repeat steps 3 and 4 until the product outputs as desired.

## LED Frequency

This option changes the Pulse Width Modulation (PWM) frequency of the LEDs on the Ovation E-910FC IP.

1. Go to the LED Frequency main level.
2. Select PWM Frequency $(\mathbf{6 0 0 H z}, 1200 \mathrm{~Hz}, 2000 \mathrm{~Hz}, \mathbf{4 0 0 0 H z}, 6000 \mathrm{~Hz}$, or $\mathbf{2 5 K h z})$.

## Fan Mode

This setting determines how the fan speed on the Ovation E-910FC IP is set.

1. Go to the Fan Mode main level
2. Select Auto (fan speed will increase or decrease based on product temperature), Off (fan will stay off. Product output will decrease based on product temperature), Silent (fan will maintain a constant silent speed), or On (fan speed will always be at maximum).

NOTICE: When operating in Fan Mode: Off, the output of the fixture will be reduced and will not reach the same levels as when using other fan modes.
WARNING: When operating in Fan Mode: Off, the fixture will become hotter to the touch than when using other fan modes. Use proper protective equipment to prevent burns. Keep a safe distance from flammable objects.

## Back Light

This setting allows for selection of the amount of time the backlight on the Ovation E-910FC IP's display stays on after the last button is pressed on the control panel.

1. Go to the Back Light main level.
2. Select 10 S ( 10 seconds), $\mathbf{3 0 S}$ ( 30 seconds), 2Min ( 2 minutes), or Always On (remains on).

## Key Lock

This setting enables users to activate or disable the control panel lock, which keeps non-authorized personnel from changing the product's settings.

1. Go to the Key Lock main level.
2. Select On or Off.

## Gobo Power

This setting provides power to the Ovation GR-1 IP (sold separately).

1. Go to the Gobo Power main level.
2. Select On or Off.

## System Information

This option displays the total number of hours the product has run, the installed software version, and the product's UID.

1. Go to the Information main level.
2. Select Fixture Hours, Version, or UID.

## Factory Reset

This option restores the Ovation E-910FC IP to factory default settings.

1. Go to the Reset Factory main level.
2. Select No or Yes.

## 5. Technical Information

## Product Maintenance

To maintain optimum performance and minimize wear, clean this product frequently. Usage and environment are contributing factors in determining the cleaning frequency.
Clean this product at least twice a month. Dust build-up reduces light output performance and can cause overheating. This can lead to reduced light source life and increased mechanical wear.
To clean the product:

1. Unplug the product from power.
2. Wait until the product is at room temperature.
3. Use a vacuum (or dry compressed air) and a soft brush to remove dust collected on the external vents.
4. Clean all transparent surfaces with a mild soap solution, ammonia-free glass cleaner, or isopropyl alcohol.
5. Apply the solution directly to a soft, lint-free cotton cloth or a lens-cleaning tissue.
6. Softly drag any dirt or grime to the outside of the transparent surface.
7. Gently polish the transparent surfaces until they are free of haze and lint.

Always dry the transparent surfaces carefully after cleaning them.

## 6. Technical Specifications

## Dimensions and Weight

| Length | Width | Height | Weight |
| :---: | :---: | :---: | :---: |
| 26 in $(660 \mathrm{~mm})$ | $11.33 \mathrm{in}(288 \mathrm{~mm})$ | $10.4 \mathrm{in}(264.6 \mathrm{~mm})$ | $23.2 \mathrm{lb}(10.5 \mathrm{~kg})$ |

Note: Dimensions in inches rounded to the nearest hundredth.

## Power

| Power Supply Type | Range | Voltage Selection |
| :---: | :---: | :---: |
| Switching (internal) | 100 to $240 \mathrm{VAC}, 50 / 60 \mathrm{~Hz}$ | Auto-ranging |
| Parameter | $\mathbf{1 2 0 ~ V , 6 0 ~ H z}$ | $\mathbf{2 3 0 ~ V}, \mathbf{5 0 ~ H z}$ |
| Consumption | 225 W | 241 W |
| Operating Current | 1.88 A | 1.05 A |
| Power-linking current (products) | $13.6 \mathrm{~A}(7$ products) | $13.6 \mathrm{~A}(12$ products) |
| Power I/O | U.S./Canada | Worldwide |
| Power input connector | Seetronic Powerkon IP65 | Seetronic Powerkon IP65 |
| Power output connector | Seetronic Powerkon IP65 | Seetronic Powerkon IP65 |
| Power Cord plug | Edison (U.S.) | Local Plug |

## Light Source

| Type | Color | Quantity | Power | Current | Lifespan |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Red | 18 |  |  |  |
| LED | Green | 18 |  |  |  |
|  | Blue | 19 | 3 W | 722 mA | 50,000 hours |
|  | Amber | 18 |  |  |  |
|  | Lime green | 18 |  |  |  |

Photometrics

| Parameter | $\mathbf{1 4}^{\circ}$ | $\mathbf{1 9}^{\circ}$ | $\mathbf{2 6}^{\circ}$ | $\mathbf{3 6}^{\circ}$ | $\mathbf{5 0}^{\circ}$ | $\mathbf{1 5}^{\circ} \sim \mathbf{3 0}^{\circ}$ | $\mathbf{2 5}^{\circ} \sim \mathbf{5 0}^{\circ}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :---: |
| Beam Angle | $11^{\circ}$ | $19^{\circ}$ | $24^{\circ}$ | $28^{\circ}$ | $41^{\circ}$ | $13^{\circ} / 24^{\circ}$ | $23^{\circ} / 36^{\circ}$ |
| Field Angle | $14^{\circ}$ | $19^{\circ}$ | $26^{\circ}$ | $34^{\circ}$ | $51^{\circ}$ | $15^{\circ} / 29^{\circ}$ | $26^{\circ} / 50^{\circ}$ |
| Illuminance @ 5 m | 4,420 lux | 2,530 lux | 1,720 lux | 1,020 lux | 457 lux | $4,260 / 1,620$ lux | $1,790 / 825$ lux |
| Thermal |  |  |  |  |  |  |  |

|  | Maximum External Temperature | Cooling System |
| :---: | :---: | :---: |
| DMX | $113^{\circ} \mathrm{F}\left(45^{\circ} \mathrm{C}\right)$ | Convection |
| DM |  |  |
|  | I/O Connector | Channel Range |
|  | 5 -pin XLR | $1,4,6,8,11,13,14,17, \mathrm{HSV}$ |

## Ordering

| Product Name | Item Code | UPC Number |
| :---: | :---: | :---: |
| Ovation E-910FC IP | 03121497 | 781462218454 |

## Returns

To get support or return a product:

- If you are located in the U.S., contact Chauvet World Headquarters.
- If you are located in the U.K. or Ireland, contact Chauvet Europe Ltd.
- If you are located in Benelux, contact Chauvet Europe BVBA.
- If you are located in France, contact Chauvet France.
- If you are located in Germany, contact Chauvet Germany.
- If you are located in Mexico, contact Chauvet Mexico.
- If you are located in any other country, DO NOT contact Chauvet. Instead, contact your local distributor. See www.chauvetprofessional.com for distributors outside the U.S., U.K., Ireland, Benelux, France, Germany, or Mexico.
 If you are located outside the U.S., U.K., Ireland, Benelux, France, Germany, or Mexico, contact your distributor of record and follow their instructions on how to return Chauvet products to them. Visit our website www.chauvetprofessional.com for contact details.
Call the corresponding Chauvet Technical Support office and request a Return Merchandise Authorization (RMA) number before shipping the product. Be prepared to provide the model number, serial number, and a brief description of the cause for the return.
To submit a service request online, go to www.chauvetprofessional.com/service-request.
Send the merchandise prepaid, in its original box, and with its original packing and accessories. Chauvet will not issue call tags.
Clearly label the package with the RMA number. Chauvet will refuse any product returned without an RMA number.

## Write the RMA number on a properly affixed label. DO NOT write the RMA number directly on the box.

Before sending the product, clearly write the following information on a piece of paper and place it inside the box:

- Your name
- Your address
- Your phone number
- RMA number
- A brief description of the problem

Be sure to pack the product properly. Any shipping damage resulting from inadequate packaging will be your responsibility. FedEx packing or double-boxing are recommended.

Chauvet reserves the right to use its own discretion to repair or replace returned products).
