All of the best of **dbx's** more than 40 years of Dynamics Processing

676

Tube Microphone Preamp Channel Strip

The Pedigree of Professional Audio.

We at dbx Professional Products are proud to introduce the all-new 676 Tube Mic Pre Channel Strip. The 676 represents all of the best of dbx's more than 40 years of dynamics processing. The 676 offers a pristine high-gain Class-A tube preamp section that runs on 250 volts, so you can dial-in everything from clean and neutral tones, to harmonically-rich and warm tones. The 676 also incorporates the compressor/limiter design from the highly sought-after 162SL, as well as a 3-band parametric EQ with sweepable mids. The 676 provides the user with the perfect channel strip for recording and live applications alike with its military-grade build and vintage-inspired controls, and VU metering.

676 Key Features
