

Futuristic Moonflower effect with high output powered by a 10W laser module and a massive beam spread.

The **Eliminator Lighting Cosmic Burst** is a futuristic Moonflower effect with high output powered by a 10W laser module. It creates hundreds of white, yellow, green and blue beams of light that rotate back and forth from two independent mirror dishes. Its massive beam spread makes it ideal for projecting on ceilings and walls at nightclubs, roller rinks, fun centers, stages and live events, and works with or without the use of atmosphere in the air (fog/haze).

The Cosmic Burst has 5 built-in lightshows and two DMX channel modes that allow users to customize their light experience. The bright OLED display with 4-button menu allows for quick and easy control of this fixture.

LIGHT SOURCE:

- 1 x 10W laser module
- Color temperature: 6,200K - 8,000K
- Beam Angle: 87-degrees
- Lamp life: 10,000 hours
- Diameter of lens: 60mm

CONTROL:

- Display: OLED with 4-button menu system
- DMX Control Modes: 6 or 7 channels
- 5 Built-in lightshows
- Protocols: DMX512 and RDM
- Firmware Upgrade via DMX link
- Smooth dimming from 0-100%
- Adjustable strobe, shutter and pulse effects
- Mirror control: Clockwise/Counter Clockwise; Fast/Slow

CONNECTIONS:

- DMX Data: 3-pin XLR In/Out
- Power Input: Indoor locking power connector
- Includes laser safety key with on/off lock
- Safety cable connection slot

ELECTRICAL:

- Multi-voltage operation: 100-240V, 50-60Hz
- Power Consumption: 20W

DIMENSIONS/WEIGHT:

- Dimensions: 8.7" x 7.7" x 9.4" (221 x 196 x 238mm)
- Weight: 4.4lbs (2 kg)

APPROVALS:

- IP Rating: IP20
- Laser Accession Number: 2210851-000

INCLUDED:

- Locking Indoor Power Cable
- Hanging Bracket
