## Behavior

When switched to on, If FAT formatted Media is inserted via the USB port. Mediamate will automatically see and play all the audio files in the root one time and stop. In that case video and photo's will not play by themselves. If the USB drive only contains photo's Mediamate will start playing them continuously as a slideshow and never stop. If the USB drive contains photo's and movies Mediamate will play all movies and stop. If files are placed in a folder they always need to be manually selected. Files will appear alphabetical 0, 1,2,3 etc. next A,b,C,d,e If you wish to play audio and photo slides together, first Place the SD-card with audio files and wait till it starts playing, secondly insert the photo files on USB-drive and press the USB button on the remote control.

## WIFI setup:

Under SETUP>NETWORK>WIFI Connection you can select your Wi-Fi network (SSID) and fill out your WPA-Key. Mediamate will test the connection first before returning to the main screen.

**WIFI AIRPLAY:** AIRPLAY is available on every smart media device, like mobile phone or tablet and enables you to stream both Audio and Video via Wi-Fi network to Mediamate.

Press the Wi-Fi button on the device or remote control to turn on Wi-Fi Mode, once Wi-Fi Mode is on, all controls for the Mediamate are locked. You can now control the Mediamate on your smart device with Airplay.
