Wentex CURTFIX® Curtain Clamp
White

creative textile solutions

Set of 10 - white

EAN: 8717748620736

This set of 10 CURTFIX® Curtain Clamps is designed to quickly and easily attach curtains to a tube, truss or any other suitable structure. The clamp - with patented design - features a strong elasticated band that stretches around the tube, truss or structure and fastens securely by inserting the smaller part into the hole on the larger part. Releasing the clamp is also easy: simply hold on to both parts and pull the smaller part downwards until it releases. A curtain can be attached to the clamp by means of the included ring and screw, keeping the clamp and curtain together for safekeeping. This innovative design leaves little room for light to pass through between the tube, truss or structure and the attached curtain. A coloured ring, available separately, can be attached to the Curtain Clamp to easily identify sets of curtains.

Special features:

- Patented design
- Quick and easy to attach and release
- Minimises space between truss and curtain
- Clamp and curtain stay together for safekeeping

Specifications:

Mechanical Specifications

WLL (kg)	8 kg
Length (mm)	200 mm
